Why I Am “*In Love With English*”

By Lai Ying Chang

Rio Salado College – Orangewood Learning Center

The English language is the most popular language in the world. There are a lot of countries that use the English Language. For example, England, Canada, United States, etc.

If I want to improve my English speaking, writing and reading, I have to learn grammar. Chinese is very different than English, especially speaking, which has a lot of pronunciations that I have to learn.

One time, I went to the store shopping with my son, and my son wanted to go to the bathroom. I did not know where the bathroom was, so I asked the store worker, “*Where the ‘batrum’ is?*” The worker looked at me that told me he did not understand what I said. I said it again, but I changed ‘bathroom’ to ‘toilet.’ Then he understood. Do you know how embarrassing that was?

If I want my reading better, I have to learn and understand lots of words. If I don’t know what the words mean, then I cannot read any newspapers, novels or letters.

Maybe English is hard to learn, but I am in love with learning English. I trust I will get better in my English every day.

How about you?
